

CLAIMS

WHAT IS CLAIMED:

1. A folded card formed from rectangular sheet material comprising:
5 a central portion; and
a pair of side flaps connected to either side of said central portion;
wherein said side flaps are folded over said central portion so that only a section of said
central portion is covered.
- 10 2. A folded card according to claim 1 wherein each of said flaps further comprise
overlying flaps that are folded back over each respective side flap.
3. A folded card according to claim 1 or claim 2 wherein the under side surface of
said side flaps have a coloured surface so that said coloured surface faces upwardly when
15 said side flap is folded over said central portion.
4. A folded card according to any one of the preceding claims wherein said
overlying flaps have a coloured surface so that said coloured surface faces upwardly
when it is folded over said each respective side flap.
- 20 5. A folded card according to any one of the preceding claims further comprising an
image or illustration printed on at least said central portion, said image or illustration
being only partially covered by said side flaps so that a portion of said image or
illustration remains visible.
- 25 6. A folded card according to any one of the preceding claims wherein said flaps are
triangular.
7. A folded card according to any one of claims 2 to 6 wherein said overlying flaps
30 are triangular.

8. A folded card according to any one of the preceding claims wherein said rectangular sheet material is square.

5 9. A folded card according to claim 8 wherein the fold line between said side flaps and said central portion extend from one corner of said square sheet material to opposite sides of said square sheet.

10 10. A folded card according to claim 9 wherein the fold line between each said side flap and respective overlying flaps extends from the point that the fold line between said side flap and said central portion intersects said opposite side to the opposite side of each said side flap.

11. A sheet to be folded into a card according to any one of the preceding claims.

15 12. A method of folding a card according to any one of claims 1 to 10 comprising:
folding a first side flap over said central portion;
folding said overlying flap of said first side flap;
folding the second side flap over said first side flap; and
folding said overlying flap of said second side flap.

20 13. A folding card substantially as hereinbefore described with reference to and as illustrated in the accompanying drawings.

25 14. A method of folding a card according to any one of claims 1 to 11 substantially as hereinbefore described with reference to and as illustrated in the accompanying drawings.
